INDEX TO VOLUME 4

The index covers only the major papers. It does not include the abstracts. For the abstracts there are separate *author* indices on pages 345-347 and 440-442. If it is desired to locate an abstract, author unknown, or search for a subject, the synopses of programs on pages 245-246 and 349-350 will prove useful in locating appropriate sections of the program showing titles and authors. Thence one may turn to the abstract desired.

Society business, programs, etc., are entered only under *American Society of Zoologists.*

Abstracts, see note above.
  author index, annual December meeting, 440.
  author index, summer meeting, 345.
  of annual December meeting, 379.
  of summer meeting, 270.
American Society of Zoologists,
  Committees, 1.
  Divisional Officers, 1.
  Officers for 1964, 1.
  President's Address, 443.
  Proceedings of 60th annual meeting, 2.
  Program of meetings, 61st annual, 351.
  Program of meetings, summer, 247.
American Zoologist,
  Directions for authors, ii.
  Editorial Board, i.
  Subscriptions, ii.
Andy, Orlando J., and Heinz Stephan. Quantitative comparisons of brain structures from insectivores to primates, 59.
Apicotermes nests, 221.

Backcross generations, in honey bees, responses of, 111.
Bees, evolution of nests of, 227.
  honey, nest cleaning in, 111.
Behavior, genetics, 97, 101, 111, 139, 169.
  mating, 147.
  species-typical, in *Drosophila*, 155.
  social, in dogs, 161.
Behavioral and physiological characters of mice, inheritance of, 125.
Birds, evolution of nests and nest-building in birds, 175.
Brain, fish, 21.
  structures from insectivores to primates, 59.
Breeding analysis of natural units in behavior genetics, 139.
Brood, disease-killed, responses to, 111.
Bruell, Jan H. Inheritance of behavioral and physiological characters of mice and the problem of heterosis, 125.

Caddisworm cases and nets, evolution of, 209.
Cases, of caddisworm, 209.
Caspari, Ernst W. Refresher course on behavior genetics: introductory remarks, 97.
  Refresher course on behavior genetics: synthesis and outlook, 169.
Caudal neurosecretory system, 37.
Cerebellar structure and function, 33.
Collias, Nicholas E. Summary of the symposium on the evolution of external construction by animals, 241.
  The evolution of nests and nest-building in birds, 175.
Comments on J. Ariëns Kappers' review and observations on pineal activity, 53.
Construction, external, by animals, 241.
Correlation of habit and structure in the fish brain, 21.
Courtship and mating behavior as a reproductive isolating mechanism in *Drosophila*, 147.

De Jonge, Bud R. Discussion of paper by W. I. Welker and others on the somatic sensory system of the raccoon, 94.
Development of social behavior in dogs, 161.
  of species-typical behavior, 155.
Dilger, William C. The interaction between genetic and experiential influences in the development of species-typical behavior, 155.
Discussion of paper by W. I. Welker and others on the somatic sensory system of the raccoon, 94.
Disease-killed brood, responses to, 111.
Dobzhansky, Theodosius. Biology: Molecular and organismic, 443.
Dogs, development of social behavior in, 161.
Drosophila, reproductive isolating mechanism in, 147.

Edinger, Tilly. Midbrain exposure and overlap in mammals, 5.
Ehrman, Lee. Courtship and mating behavior as a reproductive isolating mechanism in *Drosophila*, 147.
Evolution of caddisworm cases and nets, 209.
  of cerebellar structure and function, 33.
  of external construction by animals, 241.
  of nests and nest-building in birds, 175.
  of spider webs, 191.
  of the nests of bees, 227.
Experiential influences in the development of species-typical behavior, 155.
Exposure, midbrain, in mammals, 5.
External construction by animals, summary of symposium on, 241.

F_1 and backcross generations, in honey bees, responses of, 111.
Fish brain, correlation of habit and structure in, 21.
Fishes, teleost, neurosecretion in, 37.
Fuller, John L. Physiological and population aspects of behavior genetics, 101.

Genetic and experiential influences, interaction between, 155.
Genetics and the development of social behavior in dogs, 161.
  behavior, 97, 101, 111, 139, 169.
Goodman, Donald C. The evolution of cerebellar structure and function, 33.

Heterosis, 125.
HIRSCH, JERRY. Breeding analysis of natural units in behavior genetics, 139.
HOLMGREN, UNO. Neurosecretion in teleost fishes: the caudal neurosecretory system, 37.
Honey bees, nest cleaning in, 111.

Inheritance of behavioral and physiological characters of mice and the problem of heterosis, 125.
Innervation of the pineal organ in vertebrates, 47.
Insectivores, brain structures from, 59.
Interaction between genetic and experiential influences in the development of species-typical behavior, 155.
Isolating mechanism, reproductive, in *Drosophila*, 147.

JOHNSON, J. I., JR., W. I. WELKER, and B. H. PUBOLS. Some morphological and physiological characteristics of the somatic sensory system in raccoons, 75.

KAPPERS, J. ARIËNS. Survey of the innervation of the pineal organ in vertebrates, 47.
KASTON, B. J. The evolution of spider webs, 191.

Mammals, midbrain exposure and overlap in, 5.
Mating behavior as a reproductive isolating mechanism in *Drosophila*, 147.
Mice, inheritance of behavioral and physiological characters of, 125.
MICHENER, CHARLES D. Evolution of the nests of bees, 227.
Midbrain exposure and overlap in mammals, 5.
Morphological characteristics of somatic sensory system in raccoons, 75.

Natural units, breeding analysis of, 139.
Nest-building in birds, evolution of, 175.
Nests and nest-building in birds, evolution of, 175.
Nests, *Apicotermes*, 221.
Nest cleaning in honey bees, 111.
Nests of bees, evolution of, 227.
Nets, of caddisworm, 209.
Neurosecretion in teleost fishes: the caudal neurosecretory system, 37.
Neurosecretory system, caudal, 37.

Overlap, midbrain, in mammals, 5.

Physiological and population aspects of behavior genetics, 101.
  characteristics of somatic sensory system in raccoons, 75.
  characters of mice, inheritance of, 125.
Pineal activity, 53.
  organ in vertebrates, 47.
Population aspects of behavior genetics, 101.
Primates, brain structures from, 59.
PUBOLS, B. H., JR., W. I. WELKER, and J. I. JOHNSON, JR. Some morphological and physiological characteristics of the somatic sensory system in raccoons, 75.

Quantitative comparisons of brain structures from insectivores to primates, 59.

Raccoons, somatic sensory system in, 75, 94.
Recent advances in neuroanatomy; introduction, 4.
Refresher course on behavior genetics: introductory remarks, 97.
  synthesis and outlook, 169.
Reproductive isolating mechanism in *Drosophila*, 147.
ROSS, HERBERT H. Evolution of caddisworm cases and nets, 209.
ROTH, WILLARD D. Comments on J. Ariëns Kappers' review and observations on pineal activity, 53.
ROTHENBUHLER, WALTER C. Behavior genetics of nest cleaning in honey bees. IV. Responses of F_1 and backcross generations to disease-killed brood, 111.

SCHMIDT, ROBERT S. *Apicotermes* nests, 221.
SCHNITZLEIN, H. N. Correlation of habit and structure in the fish brain, 21.
SCOTT, J. P. Genetics and the development of social behavior in dogs, 161.
Sensory somatic system in raccoons, 75, 94.
Social behavior in dogs, development of, 161.
Somatic sensory system in raccoons, 75, 94.
Some morphological and physiological characteristics of the somatic sensory system in raccoons, 75.
Spider webs, evolution of, 191.
STEPHAN, HEINZ, and ORLANDO J. ANDY. Quantitative comparisons of brain structures from insectivores to primates, 59.
Summary of the symposium on the evolution of external construction by animals, 241.
Survey of the innervation of the pineal organ in vertebrates, 47.
Symposium on the evolution of external construction, 241.

Teleost fishes, neurosecretion in, 37.

Units, natural, breeding analysis of, 139.

Vertebrates, innervation of pineal organ in, 47.

Webs, spider, evolution of, 191.
WELKER, W. I., J. I. JOHNSON, JR., and B. H. PUBOLS, JR. Some morphological and physiological characteristics of the somatic sensory system in raccoons, 75.
